```
 1   Hi!
 2
 3   My name's Étienne (he/him), and I would like to work at moz://a!
 4
 5   I am a software developer, a good person, and a lot of fun to be around!
 6
 7
 8   Software development is my passion.
 9   I have been building applications for ten years now, with a wide variety of
10   technologies and projects. This puts me in a unique position to find the right
11   solution for a specific problem, and to get up to speed quickly on any project.
12
13   C and C++ are the first languages I ever learned, so I always keep performance
14   on the back on my mind when working on any kind of project.
15   I also have a special place in my heart for functional programming.
16   That would make me a great fit to work on low level projects,
17   especially based on Rust.
18
19   In the last few years, I have been growing fond of modern web development.
20   A world where prototyping a widely accessible product has never been so easy,
21   without sacrificing good practices or even strong typing thanks to TypeScript.
22   I would love to work as a Fullstack/Backend/Frontend developer on the
23   tools that shaped the present of the www, and will shape its future,
24   like Firefox, MDN, Mozilla VPN...
25
26
27   I am questioning my place in this society. As a privileged individual,
28   I think it is my responsibility to use my freedom to do good.
29   This naturally lead me to Mozilla, the only leader
30   of the free and open source world with good intentions by design.
31   I want my work to make everyone smile, not only investors!
32
33
34   While I can be very efficient in my own bubble, I do love
35   working as part of a team*, through various flavours of
36   Agile methodologies, peer programming, code reviews...
37
38   Outside the office, you could run by me at a dance class, riding my bike
39   to a board game night, or walking along the Landwehrkanal with my boyfriend.
40
41
42   I hope you'll be as interested in working together as I am!
43   If you have any questions, or want to arrange a meeting,
44   you can join me at etiennerobert33@gmail.com.
45
46   I will hopefully see you soon!
47
48
49   Étienne Robert
